

Executive Position Essay

I believe that I would be a best fit for treasurer of this fraternity. I was raised by two accountants who have both run the finances of the companies that they work for. My dad would always talk with me about his trading decisions, and I would always see my mom filling out balance sheets in excel. Business-wise, I saw my parents always making connections, making presentations, and memorizing speeches; they were always extremely busy. They would always talk about how difficult and how strenuous their work was, but being hard-working people, they enjoyed it. Based on how I was raised and how I have grown, I believe that treasurer is the best position for me.

In high school I was also a cofounder and treasurer of the ping pong club. I made a spreadsheet of all our logged expenses including our budget for t-shirts, ping pong paddles, and tables. This was my way of tracking finances in a way similar to that of what my parents do. All 62 members of the ping-pong club relied on me to track the money they gave me and purchase paddles, tables, and club shirts. Overall, I was in charge of a decent \$800 worth of equipment and supplies which I tracked through Excel. On the side, since the beginning of 2020 just before the recession hit, I began to delve into trading and purchasing stocks and options, or stock derivatives. I would be tracking 20 tickers per day and would trade accordingly to the actions of the fed and company data/news. I would also go based of my dad's recommendations as he has decades more experience than I do. I took his advice in high regard as he would look at company balance sheets, earnings reports, and make an informed decision based off market sentiment. Similarly, I feel as if I am responsible enough to track the finances of Delt. Though it's a large step up from tracking \$800, the job will be very similar to tracking the finances of companies when I traded in the stock market. Thus, I believe that I would be a great Treasurer.
